

AIRPORT BEACON TOWERS

Striplin manufactures airport beacon towers to FAA specification AC/150/5340 (and all subsequent dash numbers). Beacon towers can be manufactured to any height to meet customer requirements. Beacon towers come complete with anchor bolts, full climbing ladder, and catwalk with heavy industrial floor grating and guard rails. Heavy duty brackets are provided at top and bottom of tower for installation of safety climbing cable. Towers have standard FAA triangular beacon mounting platform. 51' FAA beacon towers are shipped fully assembled. Taller towers are shipped unassembled in bolt-together sections.

75' beacon tower loaded on trailer to be shipped to an airport on the west coast.

Bolt-together tower section with heavy flanges. NOTE: OSHA CLIMBING LADDER (NO DANGEROUS CLIMBING SPIKES LIKE THOSE FOUND ON OTHER POLE-TYPE TOWERS).
